Product name	**Dulbecco's Modified Eagle Medium (DMEM), Low glucose w/1gm Glucose per liter, Sodium bicarbonate and Sodium pyruvate w/o L-Glutamine**
Catalog.no	**CCML006**

2. Description

Dulbecco's Modified Eagle Medium (DMEM) is one of the most widely used modifications of Eagle's medium. DMEM is a modification of Basal Medium Eagle (BME) that contains four-fold concentration of amino acids and vitamins. Additionally, the formulation also includes glycine, serine and ferric nitrate. The original formulation contains 1000mg/L of glucose and was originally used to culture embryonic mouse cells. DMEM high glucose is a further modification of original DMEM and contains 4500mg/L of glucose. Additional glucose has proved to be useful in cultivating various other cell lines including primary cultures of mouse and chicken cells as well as various normal and transformed cell lines. Dulbecco's Modified Eagle Medium with 1gm glucose per liter, sodium bicarbonate and sodium pyruvate without L-Glutamine Users are advised to review the literature for recommendations regarding medium supplementation and physiological growth requirements specific for different cell lines.
